Kalkulator Sederhana

1. Buka Eclipse, jalankan seperti dibawah ini

- 2. Lalu buka activity_main.xml
- Tambahkan layout seperti dibawah ini

4. Edit program activity main.xml menjadi seperti dibawah ini:

```
1. <RelativeLayout
  xmlns:android="http://schemas.android.com/apk/res/android"
      xmlns:tools="http://schemas.android.com/tools"
2.
      android:layout width="match parent"
      android:layout height="match parent"
4
5.
      android:paddingBottom="@dimen/activity vertical margin"
6.
      android:paddingLeft="@dimen/activity horizontal margin"
7.
      android:paddingRight="@dimen/activity horizontal margin"
     android:paddingTop="@dimen/activity vertical margin"
8.
     tools:context="com.example.calculator.MainActivity" >
9.
10.
11. <TextView
          android:id="@+id/textView1"
12.
13.
            android:layout width="wrap content"
14.
           android: layout height="wrap content"
15.
           android:layout alignParentTop="true"
16.
           android: layout centerHorizontal="true"
17.
           android:text="KALKULATOR SEDERHANA" />
18.
19.
      <EditText
20.
         android:id="@+id/input1"
21.
           android:layout width="fill parent"
22.
           android:layout height="wrap content"
23.
           android:layout alignParentLeft="true"
24.
          android:layout below="@+id/textView1"
25.
          android:layout marginTop="22dp"
26.
          android:hint="ANGKA PERTAMA"
27.
           android:inputType="numberDecimal|numberSigned" />
28.
29.
      <EditText
30.
        android:id="@+id/input2"
31.
           android:layout width="fill parent"
32.
           android: layout height="wrap content"
33.
           android:layout below="@+id/input1"
34.
            android:hint="ANGKA KEDUA"
            android:inputType="numberDecimal|numberSigned" />
35.
36.
37. <Button
38.
           android:id="@+id/bagi"
39.
            android:layout width="fill parent"
40.
            android:layout height="wrap content"
            android:layout alignLeft="@+id/input2"
41.
           android:layout below="@+id/input2"
42.
            android:layout marginTop="26dp"
43.
            android:text="BAGI" />
44.
45.
46.
      <Button
         android:id="@+id/tambah"
47.
48.
           android:layout width="fill parent"
49.
           android: layout height="wrap content"
          android:layout_alignRight="@+id/bagi"
50.
51.
          android:layout_below="@+id/bagi"
           android:text="TAMBAH" />
52.
53.
```

```
55.
                  android:id="@+id/kurang"
      56.
                  android:layout width="fill parent"
      57.
                  android:layout height="wrap content"
                  android:layout alignLeft="@+id/tambah"
      58.
      59.
                   android:layout below="@+id/tambah"
      60.
                  android:text="KURANG" />
      61.
      62.
              <Button
      63.
                  android:id="@+id/kali"
      64.
                  android:layout width="fill parent"
      65.
                  android:layout height="wrap content"
      66.
                  android:layout alignLeft="@+id/kurang"
      67.
                  android:layout below="@+id/kurang"
      68.
                  android:text="KALI" />
      69.
      70.
              <TextView
      71.
                  android:id="@+id/hasil"
      72.
                  android:layout width="wrap content"
      73.
                  android:layout height="wrap content"
      74.
                  android:layout below="@+id/kali"
      75.
                  android:layout centerHorizontal="true"
      76.
                  android:layout marginTop="14dp"
      77.
                   android:text=""
      78.
                  android:textAppearance="?android:attr/textAppearanceMedium" />
      79.
      80. </RelativeLayout>
   5. Buka MainActivity.java dan edit seperti dibawah ini:

    package com.example.calculator;

2.
3. import android.app.Activity;
4. import android.os.Bundle;
5. import android.view.Menu;
6. import android.view.MenuItem;
7. import android.view.View;
8. import android.widget.Button;
9. import android.widget.EditText;
10.
        import android.widget.TextView;
11.
12.
        public class MainActivity extends Activity {
13.
        EditText input1, input2;
14.
        TextView hasil;
15.
        Button bagi, kurang, tambah, kali;
16.
       @Override
17.
       protected void onCreate(Bundle savedInstanceState) {
18.
        super.onCreate(savedInstanceState);
19.
       setContentView(R.layout.activity main);
20.
        input1=(EditText)findViewById(R.id.input1);
21.
        input2=(EditText) findViewById(R.id.input2);
22.
       bagi=(Button)findViewById(R.id.bagi);
23.
        kurang=(Button)findViewById(R.id.kurang);
24.
       tambah=(Button)findViewById(R.id.tambah);
        kali=(Button)findViewById(R.id.kali);
25.
26.
        hasil=(TextView) findViewById(R.id.hasil);
```

bagi.setOnClickListener(new View.OnClickListener() {

54.

27.

<Button

```
28.
29.
        @Override
30.
         public void onClick(View v) {
        // TODO Auto-generated method stub
31.
32.
        int hasilnya = Integer.parseInt(input1.getText().toString());
33.
        int hasilnya2 = Integer.parseInt(input2.getText().toString());
34.
        int hasilnya3 = hasilnya / hasilnya2;
        hasil.setText("Hasilnya adalah = " + hasilnya +" / " + hasilnya2 + " =
35.
   " + hasilnya3);
36.
        }
37.
         });
38.
         kurang.setOnClickListener(new View.OnClickListener() {
39.
40.
        @Override
41.
        public void onClick(View v) {
42.
         // TODO Auto-generated method stub
43.
         int hasilnya = Integer.parseInt(input1.getText().toString());
44.
        int hasilnya2 = Integer.parseInt(input2.getText().toString());
45.
         int hasilnya3 = hasilnya - hasilnya2;
         hasil.setText("Hasilnya adalah = " + hasilnya +" - " + hasilnya2 + " =
   " + hasilnya3);
47.
        }
48.
        });
49.
        tambah.setOnClickListener(new View.OnClickListener() {
50.
51.
        @Override
52.
        public void onClick(View v) {
53.
        // TODO Auto-generated method stub
54.
        int hasilnya = Integer.parseInt(input1.getText().toString());
55.
        int hasilnya2 = Integer.parseInt(input2.getText().toString());
56.
         int hasilnya3 = hasilnya + hasilnya2;
         hasil.setText("Hasilnya adalah = " + hasilnya +" + " + hasilnya2 + " =
 " + hasilnya3);
58.
        }
59.
        });
60.
         kali.setOnClickListener(new View.OnClickListener() {
61.
        @Override
62.
        public void onClick(View v) {
63.
64.
        // TODO Auto-generated method stub
65.
        int hasilnya = Integer.parseInt(input1.getText().toString());
        int hasilnya2 = Integer.parseInt(input2.getText().toString());
66.
67.
         int hasilnya3 = hasilnya * hasilnya2;
         hasil.setText("Hasilnya adalah = " + hasilnya +" X " + hasilnya2 + " =
   " + hasilnya3);
69.
       }
70.
        });
71.
        }
72.
73.
         @Override
74.
         public boolean onCreateOptionsMenu(Menu menu) {
        // Inflate the menu; this adds items to the action bar if it is
 present.
76.
        getMenuInflater().inflate(R.menu.main, menu);
77.
        return true;
78.
        }
79.
```

```
80.
         @Override
81.
         public boolean onOptionsItemSelected(MenuItem item) {
82.
         // Handle action bar item clicks here. The action bar will
83.
         // automatically handle clicks on the Home/Up button, so long
84.
         // as you specify a parent activity in AndroidManifest.xml.
85.
         int id = item.getItemId();
86.
         if (id == R.id.action settings) {
87.
         return true;
88.
89.
         return super.onOptionsItemSelected(item);
90.
91.
```

6. Maka Hasilnya akan seperti dibawah ini:
